

# Active Directory Management was never this easy!

- Automate mundane, repetitive tasks in AD
- Do away with command line tools or scripts
- Delegate tasks to help desk technicians
- Comply with regulatory standards like SOX, HIPAA
- Ease through audits with over 100 in-built AD reports

**ManageEngine** | **ADManager**<sup>plus</sup>  
Enjoy hassle-free AD Management and Reporting!

## The Active Directory Management Challenge

Every IT Administrator faces the challenge of managing user accounts in Active Directory almost everyday. Configuring user properties manually is extremely time consuming, tiresome, and error-prone, especially in a large, complex Windows network. Moreover, accomplishing these tasks demands a deep knowledge in Active Directory and related technologies.

A software that can automate these cumbersome tasks, simplify AD management and provide exhaustive reports on tasks done and their status, is the need of the hour.

## Introducing ADManager Plus

ADManager Plus is a comprehensive web-based Active Directory Management software that simplifies User provisioning and Active Directory administration. The solution features a single console from which IT management can view and manage Active Directory users, computers, contacts, groups and reports on Active Directory environment, ADManager Plus avoids manual, error prone administrative activities in Active Directory and save time and cost.

“We evaluated ScriptLogic Active Administrator, Quest AD management tool and ADManager Plus to solve our day-to-day AD management & Reporting needs. ADManager Plus with its high-end features and low-end cost was an obvious choice”

Meraz Nasir,  
Manager of Infrastructure (ITS),  
Interfaith Medical Center.

## The Active Directory Management Challenge

- Create/modify thousands of user accounts on the fly
- Manage user mailboxes in Exchange servers
- Manage passwords for user accounts in AD
- Template-based approach
- Clean-up Active Directory - delete/disable/move accounts

## Pre-built Reporting

- More than 100 out-of-the-box granular reports of Active Directory infrastructure resources.
- Get access to user activity, computer status, Exchange server properties, file system & printers
- Export to a number of formats like HTML, PDF, XLS, and CSV.
- Schedule reports to run daily, weekly, monthly or during off-peak hours.
- Flexible custom report development.

## Delegation: Role-based Access Management

- More granular delegation of administrative authority
- Delegate tasks like reset passwords, create/delete/disable accounts, unlock user accounts; to help desk techs
- Exercise control over every attribute modified by help desk techs
- OU-based administration

## Compliance

- Retrieve and utilize AD data to assist in organizational policy compliance
- Compliance reports to meet regulatory standards like SOX, HIPAA and more

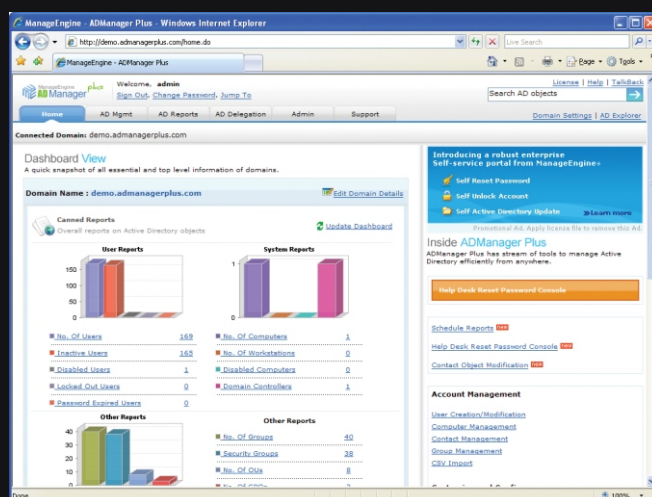

## System Requirements

- Pentium IV 1.8 Ghz, 512 MB RAM on Windows 2000, XP, 2003 & Vista. Browsers: IE & Firefox

“With ADManager Plus, we can run reports to make sure that we are staying within the compliance guidelines between audits. ADManager Plus helps us take some of the edge of SOX compliance, and since the purchase we have received good SOX reviews.”

Brian Seka,  
MicroComputer Analyst,  
Marmon/Keystone Corporation.
