

ManageEngine AssetExplorer, the asset management software that provides insight for all of your organization's assets, their state of affairs and working, for superior forecast and control.

- ◆ Manage asset procurement, deployment, specifications, monitoring, calibration, costing and tracking from a central system
- ◆ Use AssetExplore's enterprise asset management capabilities for resource optimization
- ◆ Plan inventory to meet business demand, make the right parts available at the right location when needed
- ◆ Manage vendor interaction with comprehensive support for purchase orders, contracts and Total Cost of Ownership
- ◆ Adapt to changing business requirements and connect with other enterprise systems through a flexible business process configuration platform and scalable service oriented architecture

In short ManageEngine AssetExplorer is an Asset tracking solution that is simple and easy to use with the following functionalities:

- | | | |
|-------------------|-----------------------------|--|
| ✓ Asset Inventory | ✓ Software Asset Management | ✓ Purchase Order Management & Tracking |
| ✓ Asset tracking | ✓ Software License Tracking | ✓ Contracts Management |

Control valuable IT & NON-IT assets

- ◆ Identify the physical location of your IT assets - no matter how many times they are moved around
- ◆ Identify all hardware and software changes over the life of a PC
- ◆ Ensure that your organization is legally compliant with software licensing
- ◆ Monitor and record IT equipment which has been scrapped or replaced
- ◆ Determine if you have the appropriate hardware configuration to support new software upgrades
- ◆ Maintain a comprehensive audit trail

Maximum Asset Usage with Accuracy

- ◆ Know where your assets are
- ◆ Get the list of all unused assets to put them into optimum use
- ◆ Read the asset depreciation as depreciating both at higher or lower value causes loss to your company. Higher value can invite penalties and lower value reduces benefits

The AssetExplorer Benefits

- ◆ Cut costs on IT (asset) management
- ◆ Meet statutory requirements
- ◆ Control valuable IT & NON-IT assets
- ◆ Make informed decisions
- ◆ Comply with corporate governance legislation and international accounting standards
